Explanations:

- 1) Number of meerkats present at the end of the month vs. total number of meerkats in group (both numbers including pups once they have emerged);
- 2) Number of pups present in the group at the end of the month. -1 means that the group is babysitting an unknown number of pups (before emergence);
- 3) Pregnancy status: + Pregnant at any time during the month, \* gave birth, # aborted pre-term, ^ lost litter after giving birth;
- 4) Individual status: + Last seen (unknown cause), \* found dead or euthanized, # assumed predated (for pups), ^ emigrated to another known group, “ immigrated into group, % immigrated back to previous group (after emigration);
- 5) Roving or other absence of the group's males (including the number of leaves);
- 6) Eviction or other absence of the group's females (including number of leaves);
- 7) Encounters with individuals from other groups (including number of encounters) at the group or its splinters, \* encounter with absent individuals (rovers/evictees) from own group, without re-joining;
- 8) Encounters with other groups (Inter-Group-Interactions, IGIs);
- 9) Group splits with type and how many (leaving individuals originating from splits are not considered in items 5 or 6);
- 10) Individuals that are not with the group or a splinter including the dominant female, at the end of the month.
